

Dear Commissioners:

Petition 04-160 by the National Association of Broadcasters is way out of line and is merely an attempt to curtail competition. XM Radio is an innovative product of our free enterprise system. It's inclusion of local information for traffic and weather conditions provides a valuable and appreciated service to subscribers. This is content which should not be subject to censorship or other regulation. XM Radio has a right to speak it and we have a right to hear it. The petition, as it relates to this issue, should be summarily dismissed.
